

COLLEGE ECO CLUB

OVERVIEW

The extent to which humans have adversely affected earth has reached alarming levels at present and it can threaten the long-term existence of biota. Thus, it is the need of the hour to think globally and act locally.

Eco clubs act as platforms to create sensitisation about environment by instilling among students the concept of green consciousness and making the learners understand the pivotal role of youth in conserving environment. Being a part of Eco Clubs can encourage a learner to become ambassadors for disseminating the message of adopting eco-friendly lifestyles, making informed choices at personal levels about resource utilization. Eco Clubs promote the commitment to live green, to reduce one's carbon footprint, thereby benefitting the planet. Attempts are being made to create awareness about the importance of coexistence in the ecosystem, through various activities like planting trees, cleanliness drives and organizing competitions on various environmental issues. The club also encourages 'Green Initiatives' by educating the entire college about pollution and environmental hazards through human activities and measures to minimize it. Eco Club imbibes in its members a true sense of the saying 'Live and Let Live' and promotes a holistic approach towards living on earth in order to minimize the environmental problems faced by the human race today.

MISSION

- To create awareness among the students about 5Rs
- To inculcate concern about environment and its conservation through programmes
- To enhance students' participation in conservation of the environment
- To implement efficient solid waste management in the college
- To create awareness among the staff and students to reduce the use of plastic.

THE WAY FORWARD

- Prepare inventories of polluting sources and forward it to enforcement agencies.
- Maintain parks, gardens both within and outside the college campus.

Mobilise action against environmentally unsound practices like garbage disposal in unauthorised places, unsafe disposal of hospital wastes etc.

Beautify selected roadside area with plants and flowers and put campaign boards to generate awareness.

To adopt good practices like gifting potted plants rather than flowers wrapped in polythene.

ECO CLUB ACTIVITIES

Cleanliness drives

Plantation drives

Swacchta rallies

Water conservation awareness

Activities to generate best from waste

Maintenance of college herbal garden and Eco Park
